

PL-200: Microsoft Power Platform Functional Consultant

From September 30, 2022

Configure Microsoft Dataverse (20-25%)		PL-100 Topic
Manage a data model		
1	Create or modify standard, activity, or virtual tables	
2	Configure tables ownership	
3	Create new tables or modify existing tables	
4	Determine which type of relationships to implement including 1: N and N: N	
5	Configure table relationship behaviors including cascading rules	
6	Create new relationships or modify existing relationships	
7	Create new columns or modify existing columns	
8	Create alternate keys for tables	
9	Configure table properties	
10	Configure connection roles	
11	Create and configure views	
Configure Dataverse		
12	Configure Dataverse search	
13	Configure auditing	
14	Perform data management tasks including import, export, and bulk deletion	
15	Configure duplicate detection settings	
Configure security settings		
16	Create and manage business units	
17	Create and manage security roles	
18	Create and manage users and teams	
19	Create and manage column security	
20	Configure hierarchy security	
21	Configure azure active directory group teams	
22	Manage sharing	
23	Diagnose security issues	

PL-200: Microsoft Power Platform Functional Consultant

From September 30, 2022

Create apps by using Microsoft Power Apps (15-20%)		PL-100 Topic
Create model-driven apps		
24	Create and configure multiple form types	
25	Use specialized form components	
26	Create and configure views	
27	Determine which reporting options to use including embedding Power BI or using report definition language (RDL)	
28	Configure site maps and compose model-driven apps	
29	Share a model-driven app	
30	Configure custom pages	
31	Create and configure business rules	
32	Configure modern commanding	
Define use cases for canvas apps		
33	Identify when to use a canvas app	
34	Describe canvas app structure	
35	Describe form navigation, formulas, variables and collections, and error handling	
36	Run power automate flows based on actions that occur in a canvas app	
Build Microsoft Power Pages		
37	Configure pages, forms, and navigation	
38	Configure advanced power pages features	
39	Configure website security including web roles and page access	
40	Describe use cases for templates	
41	Implement registration options	
Create and manage process automation (20–25%)		PL-100 Topic
Create cloud flows		
42	Describe types of flows, use cases, and flow components including when to use a classic workflow	
43	Describe common connectors, triggers, and actions	
44	Implement logic controls including branches, loops, conditions, error handling, and variables	
45	Implement dynamic content and expressions	
46	Test and troubleshoot flows	
Create and manage business process flows		
47	Configure a business process flow	
48	Add stages, workflows, and action steps to a business process flow	
49	Manage the business process flow table for a business process flow	
50	Configure advanced logic	
Create classic workflows		
51	Configure a workflow	
52	Troubleshoot workflows	
53	Manage workflow logs	

PL-200: Microsoft Power Platform Functional Consultant

From September 30, 2022

Describe Microsoft Power Virtual Agents (10-15%)		PL-100 Topic
Identify use cases for Power Virtual Agents		
54	Identify chatbot environments	
55	Describe chatbot skills and AI capabilities	
56	Identify options for security	
Identify components of Power Virtual Agents		
57	Describe topics	
58	Describe entities	
59	Identify use cases for fallback topics	
Import and visualize data by using dataflows and Power BI (10-15%)		
Consume Power BI in Power Platform		
60	Add Power BI tiles to model-driven apps and canvas apps	
61	Add canvas apps to a Power BI dashboard	
62	Trigger Power Automate flows from Power BI alerts	
63	Use Power BI in Power Pages	
Create and use dataflows		
64	Import data to Dataverse using Power Query	
65	Schedule dataflow runs	
66	Describe Power Fx	
Define an environment strategy (10-15%)		
Participate in Application Lifecycle Management (ALM)		
67	Describe use cases for App Checker and Solution Checker	
68	Create and manage solutions	
69	Describe the difference between managed and unmanaged solutions	
Describe interoperability with other services		
70	Add apps to Microsoft Teams	
71	Create Teams channels	
72	Identify when to use Power Automate Gateway
